

PRESCRIPTION REFILL AND MEDICAL TESTING LOG

Because your health care professional has prescribed medication as part of your treatment, it is important that you keep your prescriptions refilled. Your health care professional may also order some laboratory tests and it may be helpful to track those appointments. These tests might include a blood or urine analysis. Only your health care provider can determine what is best for you. Use the schedule below to keep track of refills and medical testing appointments.

PRESCRIPTION REFILL LOG

Date of next refill	Medication	Filled
